1	BCPL/C&P/00587/L E16S372MD/510000 0856 DT 12.01.2017	12.01.2017	PROCUREMENT OF 300 MT OF BUTENE-1 FOR LLDPE / HDPE UNIT OF BCPL	M/S RELIANCE INDUSTRIES LIMITED, NEW DELHI	2,95,74,300.00	Prior to commissioning of plant, order was issued to M/s GAIL on best endeavour / best availability basis so that plant can run after commissioning without any hindrance. M/s GAIL has supplied approx. 3238.50 MT of Butene-1 as against the agreement of 5000 MT that too after a gap of 1 year from the date of contract and started supplying Butene-1 in June'2016 only. M/s RIL although had executed the orders for 300 MT, 1500 MT besides 600 MT Butene-1 on repeat order basis till Sept'2016 [all cases awarded on open domestic competitive bidding basis], but did not execute the P.O. for 1800 MT Butene-1 placed in Sept'16 [awarded on open competitive bidding basis] due to non-availability of stock with them, moreover, citing the reason that their offer was on best availability / best endeavour basis. It is observed that supply from M/s GAIL and M/s RIL is erratic, inconsistent and intermittent thereby affecting the plant operation on day to day basis. For running the film grade polymer at approx. 70% load, consumption on consistent basis, the requirement would be approx. 1500 MT/ month and on 90% load, requirement would be 1900 MT/ month. To augment the supply of Butene-1, open ICB tender was floated and was not successful even after extension of due date number of times, which may be due to heavy detention charges of ISO Gas tanks, lack of storage facilities, demographic locations, logistic issues etc. After continuous persuasion with M/s RIL, they agreed to supply 01 no tanker from Hazira plant in Dec'16 but failed to supply the same. In turn M/s RIL had submitted fresh offer in Jan'17 to supply 300 MT Butene-1 on spot basis allowing limited time to lift. Considering the situation of uncertainty and minimal supply of Butene-1 either from RIL or GAIL leading to always crisis in plant (GAIL/RIL stopped supply of Butene-1 in earlier occasions), as a fait accompli situation, order was issued to M/s RIL on nomination basis for supply of 300 MT Butene-1 and the same has already been executed.

Accordingly order was issued to M/s RIL on nomination basis and the same has also been executed. To run PPU at 100% load, 5000 MT Polymer grade Propylene per month is required. Whereas the availability is approximately 4400 MT only (3900 MT in-house production and 500 MT from GAIL, Pata). Considering the price trend of Polymer grade Propylene being supplied by GAIL and to meet the deficiency in the requirement, other possible sources were explored for procurement of Polymer grade Propylene. In the process, M/s HPL Haldia had submitted spot offer for 60 MT for the first time which was also cheaper than the price of M/s GAIL and hence order was issued to M/s HPCL on Nomination basis to ascertain the feasibility and also to develop a second source to meet the short fall of propylene and to improve the capacity utilization of PP unit.
